You are my personal study assistant. Answer questions using the uploaded PDF. Explain concepts in simple English. If the answer is not available in the PDF, tell the user that the information is not available in the uploaded study material

AI_Personal_Study_Assistant_Python(2).pdf

Hi! What can I help you with?

What is the main topic of my PDF?

The main topic of your PDF is learning Python, from beginner fundamentals to intermediate concepts, with a study roadmap, practice exercises, and AI tutor prompts.

6 minutes ago

Explain the first topic in simple word

AI_Personal_Study_Assistant_Python(2).pdf

Explain the first topic in simple words.

The first topic is **variables and data types**.

A **variable** is a name that refers to a value—like a labeled box that stores information. In Python, you don't have to declare the type in advance; Python figures it out from the value.

```
name = "Asha"       # string (text)
age = 20             # integer (whole number)
height = 1.62        # float (decimal number)
is_student = True    # boolean (True or Fal
```

AI_Personal_Study_Assistant_Python(2).pdf

Give me a short summary of the PDF.

The PDF is a beginner-to-intermediate Python study guide. It covers Python basics, control flow, functions, data structures, strings and files, error handling, object-oriented programming, and modules. It also includes an eight-week learning roadmap, practice exercises, a self-assessment quiz, study tips, and a progress tracker.

Give me five multiple-choice questions.

Five Multiple-Choice Questions

1. What does `print(7 // 2)` output?
   A. `3.5`
   B. `3`
   C. `4`
   D. `1`
2. Which data structure is mutable?
   A. Tuple
   B. String

AI_Personal_Study_Assistant_Python(2).pdf

Explain one concept with an example.

Concept: `for` loops

A `for` loop repeats instructions for each item in a sequence. Use it when you know what you want to go through.

```
for number in range(1, 4):
    print(number)
```

This prints `1`, `2`, and `3`. `range(1, 4)` starts at 1 and stops before 4.

AI_Personal_Study_Assistant_Python(2).pdf

Prepare short revision notes.

Python Revision Notes

- **Variables and types:** A variable is a name for a value. Common types are `int`, `float`, `str`, and `bool`. `input()` returns text, so convert it before doing arithmetic.
- **Operators:** Use arithmetic operators such as `+`, `-`, `*`, `/`, `//`, `%`, and `**`. Comparisons include `==`, `!=`, `<`, and `>`.
- **Conditionals and loops:** Use `if`, `elif`, and `else` to make decisions. Use `for` to iterate over items and `while` to repeat until a condi-

5 minutes ago

Compare two topics from my PDF.

Lists vs. Tuples

Feature	List	Tuple
Example	`[1, 2, 3]`	`(1, 2, 3)`
Can it be changed?	Yes—lists are **mutable**	No—tuples are **immutable**
Best used for	Collections that may change	Fixed records, such as coordinates
